

HW2

Create manually a random table with 10 rows like the following and answer the questions:

pet_id	name	species	age
1	Fluffy	Cat	3
2	Max	Dog	5
3	Sammy	Parrot	2
4	Goldie	Fish	1

1. List all pets and their species.
2. Find the name of the oldest pet.
3. Count the number of dogs in the table.
4. Update the age of the pet named 'Fluffy' to 4.
5. Delete all pets that are older than 5.
6. Find the average age of all cats.
7. List all pets, sorted by age in descending order.

Creating the table:

```
CREATE TABLE Pets (  
  pet_id INT PRIMARY KEY,  
  name VARCHAR(50),  
  species VARCHAR(50),  
  age INT  
);
```

```
INSERT INTO Pets (pet_id, name, species, age) VALUES  
(1, 'Fluffy', 'Cat', 3),  
(2, 'Max', 'Dog', 5),  
(3, 'Sammy', 'Parrot', 2),  
(4, 'Goldie', 'Fish', 1),  
(5, 'Mira', 'Cat', 2),  
(6, 'Coco', 'Rabbit', 2),  
(7, 'Maxi', 'Dog', 6),  
(8, 'Nemo', 'Fish', 1),  
(9, 'Kiwi', 'Parrot', 3),  
(10, 'Bubbles', 'Fish', 2);
```

```
SELECT *  
FROM Pets;
```

Result Grid   Filter Rows:				
	pet_id	name	species	age
	1	Fluffy	Cat	3
	2	Max	Dog	5
	3	Sammy	Parrot	2
	4	Goldie	Fish	1
	5	Mira	Cat	2
	6	Coco	Rabbit	2
	7	Maxi	Dog	6
	8	Nemo	Fish	1
	9	Kiwi	Parrot	3
	10	Bubbles	Fish	2
	NULL	NULL	NULL	NULL

1.List all pets and their species.

```
SELECT name, species  
FROM Pets;
```

Result Grid  		
	name	species
	Fluffy	Cat
	Max	Dog
	Sammy	Parrot
	Goldie	Fish
	Mira	Cat
	Coco	Rabbit
	Maxi	Dog
	Nemo	Fish
	Kiwi	Parrot
	Bubbles	Fish

2. Find the name of the oldest pet.

```
SELECT name, age
FROM Pets
ORDER BY age DESC
LIMIT 1;
```

Result Grid   Filter Rows:		
	name	age
	Maxi	6

3. Count the number of dogs in the table.

```
SELECT COUNT(*) AS dog_count
FROM Pets
WHERE species = 'Dog';
```

Result Grid  		
	dog_count	
	2	

4. Update the age of the pet named 'Fluffy' to 4.

UPDATE Pets

SET age = 4

WHERE name = 'Fluffy';

Result Grid   Filter Rows: Search				
	pet_id	name	species	age
	1	Fluffy	Cat	4
	2	Max	Dog	5
	3	Sammy	Parrot	2
	4	Goldie	Fish	1
	5	Mira	Cat	2
	6	Coco	Rabbit	2
	7	Maxi	Dog	6
	8	Nemo	Fish	1
	9	Kiwi	Parrot	3
	10	Bubbles	Fish	2
	NULL	NULL	NULL	NULL

5. Delete all pets that are older than 5.

DELETE FROM Pets

WHERE age > 5;

	pet_id	name	species	age
	1	Fluffy	Cat	4
	2	Max	Dog	5
	3	Sammy	Parrot	2
	4	Goldie	Fish	1
	5	Mira	Cat	2
	6	Coco	Rabbit	2
	8	Nemo	Fish	1
	9	Kiwi	Parrot	3
	10	Bubbles	Fish	2
	NULL	NULL	NULL	NULL

6. Find the average age of all cats.

```
SELECT AVG(age) AS cat_age_avg  
FROM Pets  
WHERE species = 'Cat';
```

Result Grid	
cat_age_avg	
3.0000	

7. List all pets, sorted by age in descending order.

```
SELECT pet_id, name, species, age  
FROM Pets  
ORDER BY age DESC;
```

Result Grid		Filter Rows:		
	pet_id	name	species	age
	2	Max	Dog	5
	1	Fluffy	Cat	4
	9	Kiwi	Parrot	3
	3	Sammy	Parrot	2
	5	Mira	Cat	2
	6	Coco	Rabbit	2
	10	Bubbles	Fish	2
	4	Goldie	Fish	1
	8	Nemo	Fish	1
	NULL	NULL	NULL	NULL
